Heavy Duty Mechanic Apprentice Edmonton, AB

The successful candidate will assemble and repair truck mounted cranes. Other business lines include forklift repair and attachment assembly.

Reporting to the Shop Foreman, this apprentice tradesperson performs all the duties of a junior mechanic, provides exceptional customer service, ensures and promotes workplace safety, conducts product inspection and ensures superior workmanship and quality.

Key responsibilities include:

- Active participation in the safety program
- Interpretation and completion of work orders
- Learning equipment maintenance, cleaning and lubrication
- Learning diagnostic skills to evaluate and repair faults or malfunctions
- Learning to adjust equipment and repair or replace defective parts, components or systems
- Learning to perform equipment testing to ensure appropriate performance and guarantee that the completed work meets all required specifications and legislated regulations

Qualifications:

Apprentice Heavy Duty Mechanic (Off-Road Technician) with 1-2 years manufacturing and/or maintenance experience is preferred. Welding and or hydraulic experience an asset.

Please forward your cover letter and resume to:
