2010

Customer Symposium 2010

Weldco Hydra-Lift is pleased to announce a few changes in our product line! We are rolling out new Canbus electrical options, remote control operations, and are looking into new outrigger and mounting configurations - and we'd like your input!

Please join us

For a plant tour, show and tell on new design developments and an idea exchange with engineering and sales staff. Please bring your shop foreman and lead crane operator. We welcome all ideas.

NEWSROOM

REAR OUTRIGGER PREVENTATIVE MAINTENANCE ON ALL 40, 45 AND 50-TON MODELS

1. Remove panel covers from ends of boxes and wash thoroughly on a regular basis.
2. Tip crane slightly with use of outrigger legs to allow water and silt to flow out.
3. With the end panels removed, extend the leg all the way out and check for bowing in the extension cylinder. If it is bowing, remove the stop block to allow the cylinder to extend fully.
4. Hold the block in place and mark the overlap on the stop block.
5. Remove some of the block to allow the cylinder stop to hit the block as it reaches full extension - this will eliminate rod distortion and pinching of the hoses.

PARTS EXCHANGE PROGRAM

When downtime is a concern, try our new Parts Exchange Program
Bottom Line: Same Cost to You - LESS DOWNTIME!

HOW IT WORKS

Bring your crane to our Edmonton Factory Service Center and get the parts you need installed. Our Factory personnel then rebuild your old parts to a new standard for stock, which are backed by a six month warranty. The labour to exchange and the cost of the repair is paid by you. Digital photo records of the repair will be kept on file to verify the work required.

Parts can also be shipped to your facility or job site. Upon receipt of your old parts, you will be billed for the cost of repair and related shipping charges, and credited for the cost of the new parts.

All parts are primed and can be painted to match most colors. Please phone ahead for pre-painted parts.

The following will be offered on an exchange basis:

1. Hoisting Cylinders
2. Extension Cylinders
3. Swivels
4. Outrigger Extension Cylinder
5. Outrigger Vertical Cylinder
6. Valve Banks
7. Winches
8. Pumps
